The Tribal Council has created trust accounts on your behalf that have been growing from the time that you were first enrolled. Every time the Tribe has given money to members, your money has gone into one or more of these accounts, until now.

At the age of 21, all of your accounts end and you have to make a decision about what to do with your money. This booklet will walk you through your options.

WHAT ABOUT TAXES?

If you have specific questions about your minor's trust account and related tax implications, please contact your tax preparation professional.

The Rabbi Per Capita account is a tax-deferred account. Prior to the age of 14, your gaming per capita payments were deposited into this account. Once this account ends, when you reach the age of 21, and because this account is tax-deferred, it has never been reported to you or to any taxing authority for income tax reporting purposes. This information will now be reported and the entire amount of the account will be taxable. At the end of the year, you will receive a Form 1099-MISC to report this income. When the account ends we will withhold only the mandatory amount of federal tax withholdings on this account. Therefore, you may still owe additional taxes. If you desire to have additional federal tax withholdings, you may do so by completing Part III of FORM B. If you have questions related to your individual taxes, please consult with your tax preparation professional.

The majority of the dollars and related net gains and losses for the Custodial Per Capita and Custodial Timber accounts have been reported to you in prior years on an annual FORM 1099 for tax reporting purposes. At the end of the year, you will receive a FORM 1099-INT and a FORM 1099-DIV. If you have questions related to your individual taxes, please consult with your tax preparation professional.

WHAT ABOUT INVESTING?

If you have specific questions regarding investing and how it works, please contact an investment professional. The contact information for the Tribes money manager is on the contacts page.

When you put your money into your savings account, it will be professionally managed as part of the Tribe's overall portfolio. As part of the portfolio, the Tribe and their investment managers determine where and how those dollars will be invested. As with any investment, there is risk associated with the investment, but there is also the potential for gain. Studies have shown that over time, investments have the ability to gain very nicely through what is called compound interest. This can result in your savings account money becoming a substantially higher amount if invested for the long term (10+ years). However, it is important to note that this is not a guarantee and investments can go down in value as well. Please consult with an investment advisor to discuss the risks of these investments, and what the right fit is for you.
