

BIRDS

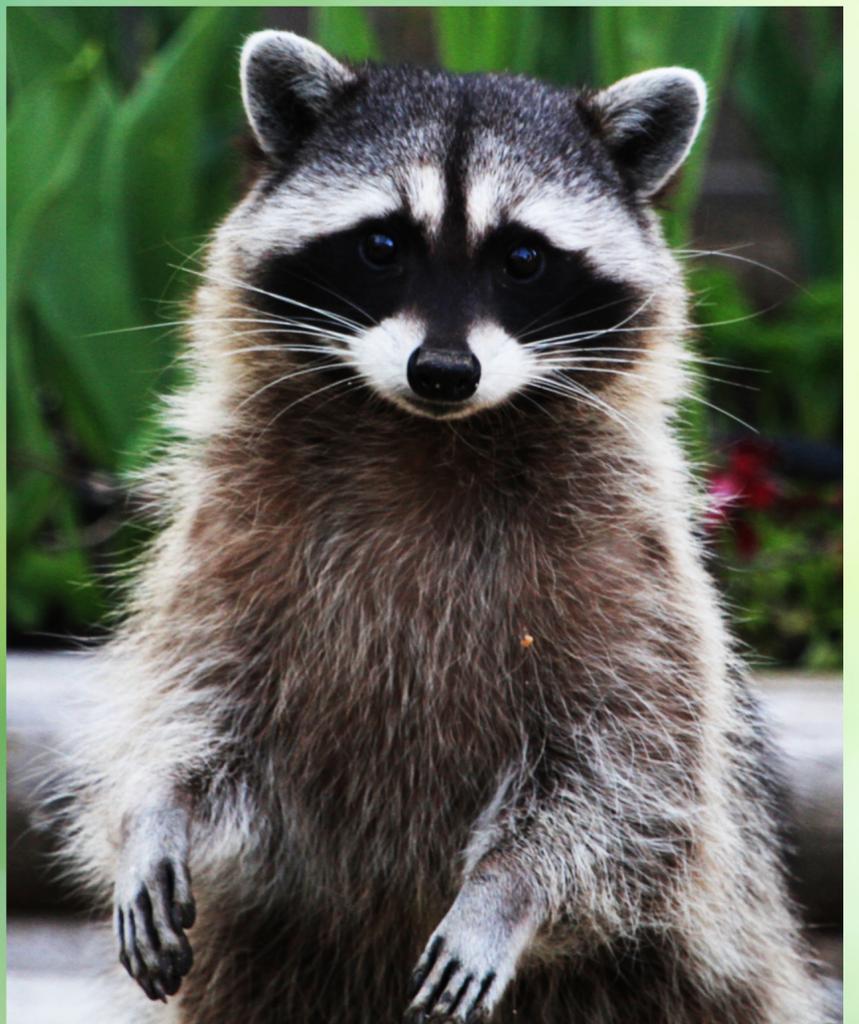

Birds live in nests in trees. They build in the branches or holes of the trees. Some build with bushes and shrubs, and some use mud.

RACCOONS

Raccoons live in dens that they make in trees. They like the dens to be dark and dry. Sometimes they even use fallen logs.

SQUIRRELS

Squirrels like to live in oak and pine trees. They build their nests in holes of the trees or in branches. They use leaves, twigs, and bark.

BEEES

Bees build nests in trees to house their colonies. They usually build their nests in holes of the trees or attached to branches.
